

LANDAUER®

MEDICAL PHYSICS

POWERFUL PARTNERSHIPS

ADVANCING IMAGING AND THERAPY

Global Physics Solutions

A LANDAUER® MEDICAL PHYSICS PARTNER

## Building a new vault or replacing equipment? Trust the shielding experts.

Our specialized team has successfully executed hundreds of shielding designs. Now with grayCAD™ software, we guarantee accurate, compliant designs in as little as 24 hours, including:

- **Optimization:** calculations for millions of points, not just a handful of survey locations, to determine exact position, type and amount of shielding – not too much or too little
- **User-friendly reports:** every detail needed to validate shielding calculations, in a simple format
- **Customized heatmap:** expected dose rates superimposed over architectural drawings enable easy detection of shielding deficiencies that could be missed when performing calculations by hand
- **Standardization:** consistent, tested analysis across hundreds of vaults, based on NCRP 151 calculation methodologies

LANDAUER Medical Physics is a full-service, nationwide practice group with exclusive access to grayCAD™, the most advanced medical radiation shielding analysis software available today. Call us today at (866) 537-2234 or email [shielding@landauersales.com](mailto:shielding@landauersales.com) to learn more.

## Building a new vault or replacing equipment? Trust the experts.

LANDAUER Medical Physics is a full-service, nationwide medical physics practice group. Call us today at (866) 537-2234 or email [shielding@landauersales.com](mailto:shielding@landauersales.com) to learn more about how our professional physics team can help you. Our services include:

- Shielding Design
- New Equipment Commissioning
- Cancer Center Planning and Design
- ACR Accreditation Pre-Certification Consulting
- Onsite Physics and Dosimetry Support
- Regulatory Compliance and Radiation Safety Programs
- Annual Linear Accelerator Quality Assurance
- Advanced Programs and Special Projects
